2.   (Currently Amended) A method according to claim 1 wherein the service to be ~~being~~ provided by said fulfillment ~~service~~ provider comprises printing, e-mailing, sharing or providing ~~obtaining the~~ a high resolution copy of said high resolution digital image.

3.   (Currently Amended) A method according to claim 1 wherein said selection of said action ~~selection~~ button automatically results in printing a high resolution copy of said high resolution digital image ~~obtaining a hard copy print that uses the high resolution stored high resolution image stored in said memory~~.

4.   (Currently Amended) A method according to claim 1 wherein said ~~accessible~~ website and said fulfillment provider are the same site.

5.   (Currently Amended) A method according to claim 1 wherein said ~~one or more~~ images are published at said ~~accessible~~ website in an HTML format.

6.   (Currently Amended) A method according to claim 1 wherein said image is provided to said website and said service provider in a JPEG ~~(including jpeg 2000)~~ format.

7.   (Currently Amended) A method according to claim 1 wherein said image is displayed at said ~~publicly accessible~~ website in a diary format.

8.   (Original) A method according to claim 1 wherein software is provided on said user computer for use in creating a web log at said accessible website.

9.   (Currently Amended) A method to according to claim 1 wherein a capture device automatically identifies ~~an~~ a digital image for automatic transfer to said ~~accessible~~ website and fulfillment provider.

10.   (Original) A method according to claim 9 wherein said identification comprises a voice activated command with respect to said capture device.

11.   (Original) A method according to claim 8 wherein said software allows appending of existing web log with new images and new log entries.

12.   (Currently Amended) A computer readable medium tangibly embodying a ~~A computer software~~ program executable by the computer to perform method steps for publishing images at ~~an accessible~~ a website coupled to a communication network and for ordering goods and/or services to be provided by a fulfillment provider also coupled to the communication network with respect to images stored at said fulfillment provider, said ~~software~~ program which when loaded and executed on ~~to a user~~ the computer will cause the computer to perform said method steps, ~~following steps to occur~~ said method steps comprising:

forwarding a high resolution digital image from a network coupled user device over the ~~a~~ communication network to said fulfillment provider, said fulfillment provider storing said high resolution digital image and associating ~~associates~~ a unique ID with said high resolution image, said unique ID identifying both a ~~the~~ storage location of where said high resolution image is stored and an ~~the~~ internet address of said fulfillment provider;

receiving over the network from said fulfillment provider said unique ID associated with said high resolution image; and

forwarding over the network to said ~~accessible~~ website from said user device a low resolution image copy of said high resolution image and said unique ID, said website publishing said low resolution image on the communication network ~~an accessible website~~ along with an action button that is associated with said unique ID, wherein selection of said action button by a viewing device coupled to the communication network ~~viewer~~ causes said viewing device to receive over the network an order screen from the fulfillment provider ~~viewer being forwarded to said fulfillment~~ so that the viewer will to be able to place an order over the network directly with said fulfillment provider for ordering goods and/or services from the fulfillment provider with respect to said high resolution image stored by said fulfillment provider.

13. (Currently Amended) The computer readable medium ~~A computer software program~~ according to claim 12 wherein the service being provided by said service provider comprises printing, e-mailing, sharing or obtaining the high resolution copy of said image.

14. (Currently Amended) The computer readable medium ~~A computer software program~~ according to claim 12 wherein said selection of said selection button automatically results in obtaining a hard copy print that uses the high resolution image stored at the fulfillment provider.

15. (Currently Amended) The computer readable medium ~~A computer software program~~ according to claim 12 wherein said accessible website and fulfillment provider are the same site.

16. (Currently Amended) The computer readable medium ~~A computer software program~~ according to claim 12 wherein said one or more images are published at said accessible website in an HTML format.

17. (Currently Amended) The computer readable medium ~~A computer software program~~ according to claim 12 wherein said image is provided to said website and said service provider in a JPEG ~~(including jpeg 2000)~~ format.

18. (Currently Amended) The computer readable medium ~~A computer software program~~ according to claim 12 wherein said image is displayed at said publicly accessible website in a diary format.

19. (Currently Amended) The computer readable medium ~~A computer software program~~ according to claim 12 wherein a capture device automatically identifies a digital image for automatic transfer to said accessible website and fulfillment provider.

20. (Currently Amended) The computer readable medium ~~A computer software program~~ according to claim 19 wherein said identification comprises a voice activated command with respect to said capture device.

21.   (Canceled)

22.   (Newly Added) A method for providing image goods and/or services over a communication network, comprising the steps of:

providing a hosting website coupled to the communication network;

receiving at the hosting website a low resolution digital copy, sent over the communication network by a user device, of a high resolution digital image, the low resolution digital copy including an unique ID, the unique ID associated with both a network connected fulfillment provider's network address on the communication network and with a storage location on a storage device at the fulfillment provider that contains the high resolution digital image; and

providing an action button on the hosting website that is associated with the fulfillment provider's network address and with the storage location, and that, when activated by a viewing device coupled to the network and accessing the hosting website, provides to the viewing device an order screen from the fulfillment provider, the order screen for placing an order over the communication network directly with said fulfillment provider for goods and/or services with respect to said high resolution digital image stored on a storage device at the fulfillment provider.
